

govn365

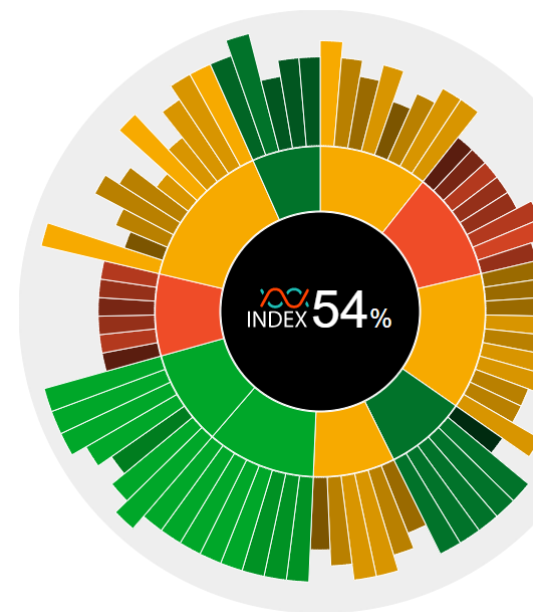

Govn365 is a comprehensive governance tool and process that helps you add value and reduce risk for your organisation.

1. Assess

Using our support, we will help you align and assess where your organisation is right now across ten governance areas covering:

- Strategy and Purpose
- High Performance Governance
- People and Culture
- Financial Stewardship
- Enterprise Risk Management
- Digital and Information Technology
- Commercial
- Health, Safety and Wellbeing
- Environment, Social and Governance
- Legal and Compliance.

2. Prioritise

We will then support and challenge you to prioritise a few key areas where you need to improve. We have done the hard work of finding and capturing resources that will help you move up the governance maturity ladder and add value to your organisation.

3. Engage

Once you have aligned on the areas to improve you can then engage your team in taking action and improving. The actions list allows you to capture specific actions to improve your governance; you detail the action you are going to take, who is accountable for it and by when.

Other Govn365 Benefits

Benchmarking

As we build the number of companies assessing their governance we will be able to benchmark where you sit against the industry or your sector.

Give Funders Confidence

If you are looking to get funding for your organisation, be it grants or capital, being able to show them your governance assessment and what actions you are taking to improve will give them the confidence to invest in you as you will have a transparent plan that they can buy into.

Retention of IP

In many organisations the knowledge sits in one or two people's heads. Govn365 ensures, through its assessment and alignment process, that everyone is clear where the organisation is at any time, what the risks and opportunities are and what actions are needed. This will ensure knowledge is shared reducing risk for the organisation.

Educate

The tool provides a comprehensive array of videos and resources to help directors and executives understand key elements of governance and what leading practice looks like. We can also link you to experts if required.

Staff Engagement

Strong staff engagement has been proven to correlate with strong financial performance. Govn365 gives you the knowledge and resources to ensure you build a strongly engaged culture and strong performance as a result.

Internal Alignment

One of the strongest links to good performance is how well the governance group and the executive team work together. Govn365 gives you a transparent tool and a facilitated process to align these groups and others internally to improve performance.

"Simple and easy to use, with resources being very applicable to topic. Nice to see that preference has been given to high level summaries and links that will allow for a deeper dive."
